SOFTWARE CONSULTANT PROFESSIONAL

Webapps Development ● Core Java Development ● Service Delivery

Domain expertise in Content Management Services

PROFILE SUMMARY

- Experienced Consultant with 7 years of expertise in Content Management Systems and enterprise architecture. Deep understanding of agile practices and product delivery methodologies.
- Experienced in architecting content management systems and deploying services across cloud platforms (AWS, Kubernetes).
- Currently contributing to collaborative architectural decisions on an enterprise file manager application, solving complex technical challenges. Self-driven learner with continuously expanding technical depth across modern stacks.

TECHNICAL SKILLS

- **Content Management & Enterprise Systems:**
  - OpenText products - Web (TeamSite), OTDS, Core Java, XSLT, FTL, FormAPI, Workflow, Interwoven Concepts.
- **Backend Development & APIs:**
  - Java, Node Js, Python, Fastify, REST API & Web Services, JSON.
  - Microservices architecture, API design, service-oriented architecture.
- **Cloud & DevOps:**
  - Kubernetes, Docker, containerization, Jenkins, Git, Bit Bucket.
  - Amazon Web Services (AWS), Lambda, DynamoDB, S3, EC2, CloudWatch, AI – Practitioner.
- **Frontend Development:**
  - React Js, HTML5, CSS3, JavaScript, jQuery, GitHub Copilot-assisted development in any tech stack.
- **Data & Streaming Technologies:**
  - Redis, Kafka message queue architecture.
- **Artificial Intelligence & Agentic Systems:**
  - Agentic AI frameworks, LLM-powered applications, AI-assisted development.

EMPLOYMENT DETAILS

- **August'22 – Present | Senior Consultant | OpenText**

Multi-tenant Content Management Platform Development & Deployment

Contributing to architectural design and hands-on development across multiple enterprise supplier communication portals built on a unified TeamSite-based platform architecture. Collaborating with cross-functional teams including architects to design scalable solutions and implement innovative features.

Key Contributions

Enterprise File Manager:

Company-assigned production system provides document management and sharing capabilities.

- Developing production full-stack file manager (Node.js/Fastify, React) with AI-powered document management and search.

- Collaborating on architectural decisions for intelligent file organization and seamless integration with legacy TeamSite infrastructure.
- Implementing novel approaches to document processing and user experience optimization.

Real-time Bulletin & Communication System:

- Built comprehensive bulletin system with LSCS runtime viewer; implemented email workflow with 70% delivery speed improvement via batch SMTP deployment.
- Designed multiple API-based applications for seamless data exchange and integration with external systems.

Portal Components & Web Applications:

- Built variety of web-based portal components tailored to individual client needs while maintaining shared architecture.
- Developed real-time web form handling with Solr indexing for dynamic data processing and retrieval.
- Implemented file viewer component enabling seamless document access and preview across portals.

Platform Enhancement & Internal Tooling:

- Developed custom workflows to optimize file migration across workareas during platform version upgrades, reducing manual deployment effort.
- Engineered automated workflow triggers that push data to Oracle DB of external reporting systems.

Key expertise: TeamSite Architecture, Java, XSLT, FTL, Node.js, Fastify, React, REST APIs, LSCS, Solr, Kubernetes, Git

➢ **January'22 – August'22 | Programmer Analyst | Cognizant**

Client: CareFirst BlueCross BlueShield

- Led TeamSite platform upgrade and migration of legacy portal infrastructure to newer version for improved scalability and performance.
- Executed complex migration activities transferring existing content and configurations from legacy system to upgraded instance, ensuring zero data loss and minimal downtime.
- Contributed to comprehensive project setup including environment configuration, deployment automation, and team onboarding.

Key expertise: TeamSite Installation, Upgrade, Migration processes; deployment coordination.

➢ **April'19 – January'22 | System Engineer | Tata Consultancy Services**

Client: Singapore Airlines Limited

- Developed and delivered new features for Singapore Airlines official website, enhancing user experience and expanding e-commerce capabilities.
- Demonstrated expertise in TeamSite architecture design, platform maintenance, and SDLC process optimization.
- Collaborated with clients to gather requirements, translate business needs into technical specifications, and deliver solutions that exceeded expectations.

Key expertise: TeamSite architecture, Java, XSLT, CaaS platforms, SDLC best practices, agile methodologies.

EDUCATION AND CERTIFICATION

Certifications: OpenText TeamSite Administrator

B.E Electronics and Instrumentation Engineering from Government College of Technology, 2015-19, Coimbatore with **8.2** CGPA.
